

Hello friends and neighbors,

We are sending you this mail today to inform you that Maxon Paving and Sealcoat will be sealing one of your neighbor's driveways on September 10th, 2018. Take this opportunity to have your driveway sealed at a discounted rate by contacting us by email or phone.

Thanks,  
Your friends at Maxon Paving

### **Common Questions:**

#### **What is Sealcoat?**

Sealcoat is an asphalt coating that protects the pavement from the elements like water, oils, and U.V. damage.

#### **What are the benefits of sealcoating my driveway?**

Scheduling a sealing application with Maxon Paving is the best way to extend the life of your driveway, as well as making it aesthetically pleasing with a matte black look. Sealing your driveway every 3-5 years is the recommended schedule between applications.

#### **Does the Sealcoat fix cracks?**

If you have cracks in your driveway it will not be sufficient enough to apply a single coat and not worry about future damage. To fully repair this damage we will apply a hot crack fill to make sure that water cannot eat away the pavement.

#### **How do I create an appointment?**

Sealcoat season is ending soon if you would like to schedule an appointment we can schedule you on the same day as your neighbor so that you can take advantage of us being directly in your area. Visit us at the website below or by calling our office to find out more about getting this premiere placement on our schedule.
